Notice of Allowability

Status of the Claims

This action is in response to papers filed 9 December 2005 in which claim 56 was and further in response to amendments discussed and agreed upon between the examiner and Mr. Murphy as detailed below.

The amendments have been thoroughly reviewed and entered. The previous rejections in the Office Action dated 13 June 2005 are withdrawn in view of the amendments. The amendments place the pending claims in condition for allowance.

Claims 56-57 and 59-69 are in condition for allowance.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Murphy on 23 February 2006.

The application has been amended as follows:

a. Cancel Claim 58.

b. Replace Claim 59 with the following:

59. The apparatus of claim 56, wherein the flow cell substantially surrounds the active area of the biochip.

c. Replace Claim 61 with the following:

Art Unit: 1634

61. The apparatus of claim 56, wherein the flow cell has a defined volume.

d. In the specification, first paragraph, line 2, after "filed August 27, 1998," insert ---
now issued as U.S. Patent No. 6,245,508 --- .

e. In the Abstract, delete lines 10-27.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claims are drawn to an apparatus comprising a circuit board, a biochip adhesively mounted to the circuit board, a permeation layer on the biochip and a fluidic system comprising a flow cell. The element distinguishing the apparatus over the prior art is the positioning of the window within the flow cell so as to be parallel with the plane of the biochip and the flow cell, but offset from the plane of the flow cell as illustrated in Fig. 6. While Hollis teaches a flow cell apparatus comprising a biochip and Wilding teaches a windowed flow cell, the prior art does not teach or fairly suggest a biochip device having the claimed optical window positioning.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 56-57 and 59-69 are in condition for allowance.
